Project announcement

“DEVELOPMENT AND LAUNCH OF THE ELECTRONIC SYSTEM FOR REPORTING ON THE IMPLEMENTATION OF STATE GENDER EQUALITY DOCUMENTS AT THE LOCAL LEVEL”

The pilot project "Development and launch of an electronic reporting system for the implementation of state documents on gender equality at the local level" is implemented by the Kyiv Institute of Gender Studies with the support of the National Social Service of Ukraine. The project is implemented with the support of the International Renaissance Foundation from October 15, 2021 to May 16, 2022.

The project will solve four main tasks:

1. Analyse the state of gender equality bodies at the local level; make a report and provide recommendations.
2. Development of a sample e-reporting system for local gender focal points, its indicators, and proposals for the reporting algorithm for it.
3. Approval of these proposals by the National Social Service's Working Group on the development of the electronic reporting system (with the participation of the Ministry of Digital Transformation of Ukraine, the Office of the Government Commissioner for Gender Equality Policy, and women's organizations).
4. Launch and support of an electronic reporting system for gender coordinators of the National Social Service of Ukraine to monitor the implementation at the local level of state documents on gender equality.
